

RAIL Protection

S A F E T Y Solution

Providing Safety without impacting productivity

The design of a safety rail is to provide a barrier between you and danger, however if it limits you in your capabilities then what's the point. CDI designed a Safety Rail that easily raises and collapses with a push of a button. In its collapsed position the safety rail is flush with the ground or platform making loading and unloading of equipment and individuals easy. Once raised the Safety Rail provides a complete safety barrier.

- Expands up to 42"
- Closed dimensions: 8" High by 6" Wide
- Custom length from 30" to 144"
- Meets OSHA rail standards
- Pneumatic or Electrical Drive
- Easy bolt on installation or drop into pocket
- Optional Safety Curtain
- Combine end to end for unlimited lengths

Collapsed position:
flush with ground/platform

Start and stop at any location

Completely raised—42"
