

FALL Protection

S A F E T Y Solution

Improving safety and productivity; Giving you peace of mind.

100% CONNECTION—CDI's Connector Tech smart system now allows you and (or) the equipment you are operating to know 100% if you are safely connected. The Connector Tech smart systems communicates with the equipment preventing any operation to begin if the operator is not properly tied-off. The system can also be connected to a indicator box that show connection or non-connection via lights.

- Built in radio frequency payload ensures Workers correctly use fall protection. Work can't begin until the worker is safe! Helps ensure 100% tie-off.
- Direct communication with equipment ensuring 100% tie-off before operation can start.
